ORC UPDATE

ORC Weekly Report to the RA's Office

- Idaho Power files complaint in Hells Canyon Site-Specific Criteria matter pursuant to Clean Water Act and Administrative Procedure Act.

On June 6, 2018, Idaho Power filed a complaint in the District of Idaho alleging that EPA's failure to approve or disapprove site-specific water quality criteria ("SSC") for temperature violated the Clean Water Act (CWA) and the Administrative Procedure Act (APA). The SSC at issue was submitted to EPA by the State of Idaho on June 8, 2012, and proposed to change the temperature criteria for the Snake River below Hells Canyon Dam. The existing criteria protect Fall Chinook salmon spawning in the Snake River for the period between October 23 and November 6. The applicable temperature criteria is significant for the CWA Section 401 certification require from both Idaho and Oregon for the ongoing relicensing of the Hells Canyon dam. The complaint alleges that, by failing to act, EPA has violated a mandatory duty under the CWA, has unreasonably delayed and unlawfully withheld action pursuant to the APA, and has arbitrarily and capriciously considered outside factors in its deliberations on the approval of the SSC. DOJ attempted to negotiate a tolling agreement to prevent the immediate filing of the complaint, but Idaho Power declined to do so.
